PERSONAL DETAILS & SUMMARY

Place & Date of Birth: Malang, 23 November 2001

Professional Summary:

A tech enthusiast and professional with a solid academic background in Information Technology and Artificial Intelligence. Deeply interested in the fields of AI development, data analysis, and technical writing. Passionate about exploring machine learning algorithms, uncovering actionable insights from data, and sharing knowledge through written content. A detail-oriented individual eager to bridge the gap between complex technological concepts and engaging written communication.

EDUCATION

BRAWIJAYA UNIVERSITY

Bachelor of Information Technology

Cumulative GPA: 3.74/4.0;

Relevant Coursework: Basic Programming, Web Programming, Android Programming, Database Administration, Machine Learning, Cyber Security

Malang, Indonesia
September 2020 – January 2024

GADJAH MADA UNIVERSITY

Master of Artificial Intelligence

Cumulative GPA: 3.84/4.0;

Relevant Coursework: Artificial Intelligence, Large Language Model, Machine Learning, Deep Learning, Bio Inspired System, Expert System

Yogyakarta, Indonesia
August 2024 – June 2026

EXPERIENCE

INaAI – AI Engineer

October 2025 – May 2026

- Utilizing YOLO for CCTV Plate Detection
- Shelf Compliance SKU Detection Using YOLOv11 and DINOv
- Creating Insight about data using LLM Qwen3
- Automatic scheduling, routing problem
- Creating store stock sales planning optimization

TIMES INDONESIA – IT Programmer and Digital Strategy

November 2022 – June 2024

- Optimized SQL queries and maintained news platform databases
- Developed automation tools for keyword extraction in news articles
- Built media monitoring system for article title tracking

FILKOM BRAWIJAYA – Practicum Assistant (SysAdmin)

January 2023 – May 2023

- Managed Linux system tasks including user/group management, firewall config, and TCP/IP setup
- Conducted hands-on lab sessions using Ubuntu OS

PROJECTS

SnS PROJECT

September 2021 – November 2021

Website for Selling Shoes

- Designed and developed a full-stack e-commerce web application dedicated to shoe retail using the Laravel framework and PHP
- Implemented core features including product catalogs, shopping carts, and database management to ensure a seamless user experience

KAFFEHAUS

May 2023 – Jun 2023

Bangkit Academy 2023 Project

- Developed a personalized café recommendation mobile application as part of the Bangkit Academy 2023 capstone project

- Engineered the recommendation engine using Keras, combining collaborative filtering and content-based filtering algorithms to deliver highly accurate user suggestions

KEYWORD EXTRACTION

September 2023 – November 2023

Automatic Keyword Extraction for News

- Built an automated Indonesian keyword extraction pipeline tailored for news platforms using graph-based TextRank and Named Entity Recognition (NER)
- Improved metadata generation and searchability for news archives by accurately identifying key entities and contextual phrases

AUTOMATIC BEST MOVE CONGKLAK GAMES

August 2024 - September 2024

- Implemented the Minimax Algorithm to engineer an AI opponent capable of calculating optimal strategies and predicting best moves for the classic game of Congklak

ROMANCE INTEREST DETECTION FROM TEXTS

December 2025

- Fine-tuned Sailor2-8B Large Language Model (LLM) to accurately identify and analyze romantic interest patterns within text-based chat messages
- Optimized model performance for nuance detection in conversational data, leveraging advanced NLP and fine-tuning techniques.

QUESTION ANSWERING FROM ARTICLE

August 2025

- Developed and deployed an advanced Question Answering (QA) system utilizing Retrieval-Augmented Generation (RAG) architecture
- Enhanced information retrieval efficiency, enabling the system to extract precise answers directly from unstructured articles and documents

VOLUNTEER & ORGANIZATION EXPERIENCE

Youthwin Economic

October 2020

Improving the financial and life skills among poor and vulnerable youth

PK2MABA & STARTUP ACADEMY 2021

May 2021- December 2021

PK2MABA & Startup Academy is a program to introduce campus life to new students.

Staff of Relation Division

- Liaison the committee with the invitation
- Managed social media

IT-MOSPHERE 2021

October 2021-November 2021

IT-Mosphere is anniversary celebration of Information Technology department

Vice Head of Equipment and Logistics Division

- Managed Operator during the event
- Prepare the equipment needed for the event

BEM FILKOM UB - Staff of Strategic Assessment and Action

April 2021 – January 2022

BEM is an intra-campus student organization.

- Examining Campus and State Politics

FILFASET 2022

May 2022– December 2022

FILAFEST is anniversary celebration of Faculty of Computer Science

Staff of Fundraising Division

- Finding funds for the event

CERTIFICATION

Tensorflow Developer Certificate

September 2023 – September 2026

Credential Link: [TensorFlow Developer Certificate • Muhammad Theofany Aulia Anwar • TensorFlow \(credential.net\)](#)

Machine Learning

March 2023

Credential Link: <https://coursera.org/share/5b8e219b7ceb6bc933ea9194644c5cdf>

DeepLearning.AI TensorFlow Developer

April 2023

Credential Link: <https://coursera.org/share/d6ea7137f2feb737ed6219f2f990d515>

TensorFlow: Data and Deployment

May 2023
